TPCODL Empowers Rural Odisha with Resilient Climate Action Program for Sustainable Agriculture

Bhubaneswar (correspondent): In a major step toward sustainable rural development, TP Central Odisha Distribution Limited (TPCODL), a joint venture of Tata Power and the Government of Odisha, has launched a Resilient Climate Action Program under its flagship community development initiative, Samriddhi, in Kujang Block of Jagatsinghpur district. The program aims to promote climate-resilient agricultural and allied practices, equipping farmers with the knowledge and tools necessary to adapt to changing climate conditions. It focuses on strengthening community preparedness, reducing climate-related risks and enhancing income stability for farming households through enterprise development. TPCODL is ensuring that these innovative practices are not only introduced but also effectively adopted at the grassroots level. Through training sessions and field demonstrations, the initiative is designed to foster long-term behavioural change and build resilience in the agricultural sector. This program reaffirms TPCODL's commitment to community empowerment, environmental sustainability and inclusive development across its operational areas.

Empowering women, celebrating tradition: TPCODL's eco-friendly rakhis for Raksha Bandhan

BHUBANESWAR, AUG 5

AS Raksha Bandhan approaches, TP Central Odisha Distribution Limited (TPCODL) is spreading festive joy through its CSR initiative 'Samridhi'. This year, the company empowers rural women artisans by helping them craft eco-friendly Rakhis using traditional Odisha art forms like Pattachitra, Dhokra, and palm leaf.

The initiative supports over 300 women artisans from the Ballanta art cluster and Saptasajya heritage village, promoting economic independence and cultural preservation. With training, market support, and capacity-building, TPCODL is reviving Odisha's age-old

crafts while fostering entrepreneurship among rural women.

A special stall at IDCO Towers, Bhubaneswar, attracted hundreds of visitors, who admired the handcrafted Rakhis. These eco-friendly pieces are available at local stalls, exhibitions, and online platforms, offering a sustainable way to celebrate Raksha Bandhan.

TPCODL's 'Samridhi' initiative highlights its commitment to inclusive development, environmental responsibility, and cultural revival. This Raksha Bandhan, the company encourages everyone to tie a Rakhi that symbolizes tradition, empowerment, and sustainability.

TPCODL empowers women

Bhubaneswar: As the much-awaited RakshaBandhan festival draws near, TP Central Odisha Distribution Limited (TPCODL), a joint venture of Tata Power and the Government of Odisha is spreading joy beyond power supply through its flagship CSR initiative Samridhi. Focused on women empowerment and cultural preservation, TPCODL is supporting rural women artisans in crafting eco-friendly Rakhis using Odisha's traditional art forms like Pattachitra, Dhokra and Palm Leaf. Through training, capacity-building, and market linkage support, TPCODL is helping over 300 women artisans gain economic independence. A special stall was installed at IDCO Towers, Bhubaneswar, to showcase the Rakhis prepared by the artisans. Hundreds of people visited the stall and admired these beautifully handcrafted Rakhis, supporting both tradition and empowerment.

Empowering Odisha's Youth: TPCODL's Project Daksh and Odisha Green Jobs Academy drive skill development

PBD BUREAU
BHUBANESWAR, AUG 13

TP Central Odisha Distribution Limited (TPCODL), a joint venture between Tata Power and the Government of Odisha, is making significant strides in youth empowerment through its flagship CSR initiatives – Project Daksh and the Odisha Green Jobs Academy. These programs are equipping rural youth and women with job-ready skills, fostering employment opportunities and financial independence.

Launched in September 2023, TPCODL's Vocational Training Centres (VTCs) in Angul, Khordha, and Cuttack districts offer short-term, industry-aligned courses conforming to National Skills Qualification Framework (NSQF) Level 3 standards. Training modules include high-demand sectors such as facility management, plumbing, electric vehicle (EV) servicing, and solar panel installation.

To date, 440 young men and women have completed training and certification, with all trainees successfully placed in reputed companies. Project Daksh emphasizes practical skills for formal employment, while the Odisha Green Jobs Academy focuses on sustainable transition sectors such as solar energy, electric vehicle servicing, and solar panel installation.

The transformative impact of these initiatives is evident in testimonials from both beneficiaries and trainers. Priti Gochhayat, a certified security guard, spoke of her newfound confidence and self-reliance. Trainer Tushar Ranjan Ojha noted the remarkable transition of rural youth into skilled professionals earning better livelihoods.

TPCODL CEO, Arvind Singh, reiterated the company's commitment to community development. "Our vocational training initiatives are not just creating jobs – they're building careers, empowering women, and transforming lives across Odisha," he said.

Odisha leading the way in solar-powered sustainability

ON Akshay Urja Diwas, we celebrate India's unwavering commitment to renewable energy and sustainability. The sun, our most abundant and reliable source of energy, holds the key to a cleaner and greener future. Today, through visionary initiatives like the PM Surya Ghar: Muft Bijli Yojana, this future is no longer a distant dream but a reality within the reach of every Indian household.

The PM Surya Ghar Yojana is a transformative step in India's journey towards energy self-reliance. With attractive financial support, it makes rooftop solar affordable for the common citizen. For example, a 3 kW system now comes with a Rs 78,000 subsidy from the Central Government and an additional Rs 60,000 subsidy from the Government of Odisha. Such

unprecedented support ensures that families can enjoy the benefits of clean, renewable energy while reducing their dependence on conventional grid power.

Odisha, known for its natural resources and resilience, is emerging as a solar-centric and sustainability-promoting state. From industries to households, the shift towards solar energy reflects our collective determination to fight climate change, reduce carbon emissions, and build an energy-secure tomorrow. With abundant sunshine throughout the year,

Odisha is uniquely positioned to lead this green energy movement.

To make this vision a reality, the government has launched the Utility-Led Aggregation (ULA) model under the PM Surya Ghar: Muft Bijli Yojana. Through the ULA scheme, domestic consumers with a 1 kW contract demand can now install rooftop solar systems on their homes with minimal financial burden. Backed by Central and State Government subsidies, a consumer contributes only Rs 5,000 plus the cost of a generation meter, while enjoying up to 100 units of clean, green electricity every month. With five years of free maintenance and a system lifespan of over 25 years, this is not only a financial saving but also a long-term investment in

sustainability.

Odisha's future shines bright with the promise of solar power. Each rooftop that adopts solar energy is a step towards energy independence, a reduction in carbon footprint, and a greener tomorrow for our children. At TPCODL, we are proud to be at the forefront of this change — facilitating, supporting, and ensuring that every consumer has the opportunity to embrace solar energy with confidence.

On this Akshay Urja Diwas, let us recognize that sustainability is no longer a choice but a shared responsibility. By embracing initiatives like the PM Surya Ghar: Muft Bijli Yojana and the ULA model in Odisha, we can turn our homes into powerhouses, our state into a leader in renewable energy, and our nation into a beacon of sustainable progress.

Odisha Leading the Way in Solar-Powered Sustainability : By Arvind Singh, CEO, TPCODL

Bhisheneerav (TNS): On Akshaya Utsav Dinam, we celebrate India's unwavering commitment to inexhaustible energy and sustainability. The sun, our most abundant and reliable source of energy, holds the key to a cleaner and greener future. Today, through visionary initiatives like the PM Surya Ghar: Muft Hui Yojana, this future is no longer a distant dream but a reality within the reach of every Indian household. The PM Surya Ghar Yojana is a transformative step in India's journey towards energy self-reliance. With attractive financial support, it makes rooftop

value affordable for communities. For example, a 3kW system now comes with a 778,000 subsidy from the Central Government and an additional 300,000 subsidy from the Government of Odisha. Such unprecedented support ensures that families can enjoy the benefits of clean, renewable energy while reducing their dependence on conventional grid power. Odisha, known for its natural resources and resilience, is emerging as a solar-centric and sustainability-promoting state. From industries to households, the shift towards solar energy reflects

our collective determination to fight climate change, reduce carbon emissions and build an energy-secure tomorrow. With abundant sunshine throughout the year, Oñiza is uniquely positioned to lead this green energy movement.

To make this vision a reality, the government has launched the Utility-Led Aggregation (ULA) model under the PM Surya; Ghar Muft Highway Yojana. Through the ULA scheme, domestic consumers with 1 kW contract demand can now install rooftop solar systems on their homes with minimal financial burden.

Backed by Central and State Government subsidies, a consumer contributes only 75,000 plus the cost of a generation meter, while enjoying up to 100 units of clean green electricity every month. With five years of free maintenance and a system lifespan of over 25 years, this is not only a financial saving but also a long-term investment in sustainability. Ofidat's initiatives brighten with the promise of solar power. Each rooftop that adopts solar energy is a step towards energy independence, a reduction in carbon footprint and a greener

known for our children. At TPCOR, we are proud to be at the forefront of this change-facilitating, supporting and ensuring that every consumer has the opportunity to embrace solar energy with confidence. On this Alkash Arjya Datta, let us recognize the sustainability is no longer a choice but a shared responsibility. By embracing initiatives like the PM Surya : Ghar Muft Bharat and the U.S. model in Odisha, we can turn our dreams into power. However, our future lies in a leader in renewable energy and our nation into a beacon of sustainable growth.

TPCODL Strengthens Rural Engagement through 'Gaan Chala' Initiative, Touches Thousands of Lives

BHUBANESWAR, Correspondent)-TP Central Odisha Distribution Limited (TPCODL), a joint venture of Tata Power and Government of Odisha, has been intensifying its rural outreach through the "Gaan Chala" initiative. Organised across its licensed area these village-level service camps have become important touchpoints for delivering electricity-related services directly to the community. Thousands of rural customers have already been reached through these camps, where new service connections are being processed, bill revisions are carried out and consumer queries are addressed with on-the-spot solutions. This doorstep approach has

ensured hassle-free service delivery while reducing the need for consumers to travel to Customer Care Centers for assistance.

Beyond service facilitation, the initiative also places strong emphasis on digital inclusion. Many rural customers have successfully enrolled in TPCODL's digital platforms, which allow them to pay bills online, register complaints and

receive real-time service updates. This shift is enabling rural households to enjoy faster, more transparent and convenient access to services.

The camps also feature dedicated counselling sessions to create awareness about the ongoing "Bill Pay and Win" scheme. These sessions encourage timely bill payments and highlight the benefits

and rewards of adopting digital payment modes, making consumers active partners in the digital transformation journey. Through "Gaan Chala", TPCODL is not only bridging service gaps but also fostering stronger bonds with rural communities by ensuring that electricity services are accessible, transparent and customer-friendly at the grassroots level.

टीपीसी ओडीएल की 'गांव चलो' पहल से मजबूत हुआ ग्रामीण जुड़ाव, हजारों उपभोक्ताओं तक पहुंची सुविधाएं

भुवनेश्वर। टाटा पावर और ओडिशा सरकार की संयुक्त उद्यम कंपनी टीपी सेंट्रल ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीसीओडीएल) ग्रामीण उपभोक्ताओं को सहायता बनाने के लिए अपनी 'गांव चलो' पहल को तेजी से आगे बढ़ा रही है। इस पहल के तहत गांव-स्तरीय सेवा शिबिर आयोजित किए जा रहे हैं, जहां उपभोक्ताओं को नए बिजली कनेक्शन, बिल संशोधन और शिकायतों का तत्काल समाधान जैसी सेवाएं उपलब्ध कराई जा रही हैं। अब तक हजारों ग्रामीण उपभोक्ता इन शिबिरों से लाभान्वित हो चुके हैं। शिबिरों में ग्रामीणों को डिजिटल प्लेटफॉर्म से जोड़ने पर भी विशेष ध्यान दिया जा रहा है। बड़ी संख्या में उपभोक्ताओं ने अब

ऑनलाइन बिल भुगतान, शिकायत दर्ज करने और सेवाओं की रियल-टाइम जानकारी जैसी सुविधाओं का लाभ उठाना शुरू कर दिया है।

इसके साथ ही 'बिल पे एंड विन' योजना को लेकर परामर्श सत्र भी आयोजित किए जा रहे हैं, जिनमें समय पर बिल भुगतान करने और डिजिटल माध्यम अपनाने के फायदे बताए जाते हैं। 'गांव चलो' पहल न केवल सेवाओं की दूरी को कम कर रही है, बल्कि उपभोक्ताओं के साथ टीपीसीओडीएल का रिश्ता भी और मजबूत बना रही है। इससे बिजली सेवाएं अब गांवों में अधिक फास्ट, सुविधाजनक और उपभोक्ता-अनुकूल हो रही हैं।

TPCODL Rolls Out Proactive Safety Measures for the Festival Season

Bhubaneswar, Aug 27 (FN Representative)

TP Central Odisha Distribution Limited (TPCODL), a joint venture of Tata Power and Government of Odisha, has rolled out a series of proactive safety measures to ensure uninterrupted and safe power supply during the upcoming festivals. Reinforcing its commitment to public safety, TPCODL has issued guidelines advising event organizers and vendors to obtain legal temporary connections for pandals and temporary shops. It has strongly warned against illegal hook-ups, stressing that such practices are unlawful, endanger lives, increase the risk of fire and can severely disrupt power supply. TPCODL's dedicated teams will be deployed on the ground to monitor supply, facilitate temporary connections and prevent unauthorized usage. Key Safety Guidelines Issued by TPCODL: Engage only licensed electricians for wiring and testing. Ensure Pandals are not below the electrical lines. Maintain a safe distance from electrical installations. Avoid illegal hook-ups at all costs. Secure legal temporary connections for pandals, shops and lighting. Use 30 mA RCCB for added safety. Ensure proper earthing of all electrical setups. Install fire extinguishers and use energy-efficient LED lights. Do not use metallic pipes/rods in flags to prevent accidental contact with live wires. TPCODL has also strengthened its 24x7 Call Centre (1912/1800-345-7122) to address consumer concerns and emergencies during the festivities. Speaking on the occasion, Arvind Singh, CEO, TPCODL, said: "At TPCODL, safety remains our top priority. We urge citizens, organizers and vendors to follow the prescribed safety guidelines and opt for legal temporary connections. Together, we can make this festive season both joyful and safe." TPCODL is dedicated to making this festive season a safe and electrifying experience for all and wishes everyone a joyful and secure celebration. TPCODL – For you, with you always."
