## TPCODL Coverage Clips:

# TPCODL enhances power reliability for over 12,000 consumers in Bhubaneswar

PBD BUREAU

BHUBANESWAR, MAY 2

TP Central Odisha Distribution Limited (TPCODL) has commissioned 2 RMUs (Ring Main Units) at Gothapatna PSS and Nuagaon Chowk, along with 4 km of underground cable network.

The upgrade is benefiting around 12,000 consumers across Kantabada, Gothapatna, Bharatpur and nearby areas through improved reliability, faster fault isolation, reduced outages and better voltage profile.

In another initiative, TPCODL has commissioned a 63 kVA Distribution Substation Structure under Mukhya Mantri Shakti Bikash Yojana in Palashpur.

Around 400 consumers in Palashpur village and Uttara, Bhubaneswar will benefit from improved and reliable power supply.

These initiatives reaffirm TPCODL's commitment to delivering safe, reliable and quality power to its consumers.

# ଗ୍ରାହକଙ୍କୁ ଟିପିସିଓଡିଏଲ୍‌ର ଭରସାଯୋଗ୍ୟ ବିଦ୍ୟୁତ ସେବା

# TPCODL enhances reliable power supply for more than 8,000 consumers in city

**BHUBANESWAR, MAY 5**

TP Central Odisha Distribution Limited (TPCODL) has commissioned a 25 MVA Power Transformer at Bharatpur PSS under BCDD2 Division, benefiting nearly 8,000 consumers in Bharatpur, Kalinga Nagar and Khandagiri areas of the Capital city with improved power reliability and better voltage.

Additionally, a 250 kVA Distribution Transformer has been installed at Khandual Basti under the same division, enhancing power supply for around 350 consumers in Khandual Basti and GA Plot area.

These initiatives reaffirm TPCODL's commitment to delivering reliable and quality power to consumers.

# टीपीसी ओडीएल ने बढ़ाई बिजली क्षमता, भरतपुर समेत कई इलाकों में सुधार

**भुवनेश्वर।** बिजली आपूर्ति को और अधिक विश्वसनीय बनाने के लिए टाटा पॉवर सेंट्रल ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीसीओडीएल) ने भरतपुर पीएसएस में 25 एमवीए क्षमता का पावर ट्रांसफॉर्मर स्थापित किया है। इस पहल से भारतपुर, कलिंग नगर और खंडगिरि क्षेत्रों के लगभग 8,000 उपभोक्ताओं को बेहतर वोल्टेज और निर्बाध बिजली आपूर्ति का लाभ मिलेगा। इसके अलावा, बीसीडीडी2 डिवीजन के तहत खंडुआल बस्ती में 250 केवीए का डिस्ट्रीब्यूशन ट्रांसफॉर्मर भी लगाया गया है। इससे खंडुआल बस्ती और जीए प्लॉट क्षेत्र के करीब 350 उपभोक्ताओं की बिजली आपूर्ति में सुधार होगा। कंपनी का कहना है कि उपभोक्ताओं को बेहतर, स्थिर और गुणवत्तापूर्ण बिजली उपलब्ध कराने के लिए हम लगातार प्रयासरत है। इन सुधारों से न केवल बिजली कटौती में कमी आएगी, बल्कि वोल्टेज की समस्या भी काफी हद तक दूर होगी।

# TPCODL organises National Lok Adalat across central Odisha

**PBD BUREAU**

BHUBANESWAR, MAY 8

TPCODL
TP CENTRAL ODISHA
DISTRIBUTION LIMITED

TP Central Odisha Distribution Limited (TPCODL), a joint venture of Tata Power and the Odisha Government organises the 2 nd National Lok Adalat and Settlement Camp on Saturday across its operational areas to enable speedy resolution of cases related to unauthorised electricity usage and power theft.

The initiative, being conducted under the framework of the National Legal Services Authority (NALSA), aims to provide consumers with an accessible and time-bound platform for settlement of pending enforcement-related cases.

The Lok Adalat is being held from 9:00 AM to 5:00 PM at all Division, Sub-Division and Section Offices under TPCODL's jurisdiction. Consumers can avail on-the-spot assistance for settlement of eligible cases and regularisation of electricity connections.

TPCODL has urged consumers with pending enforcement cases to utilise the opportunity to resolve disputes amicably and avoid future legal or financial complications.

To ensure smooth facilitation, dedicated teams comprising enforcement officials, legal professionals and trained support staff have been deployed at all designated locations.

The teams are assisting consumers with documentation, eligibility criteria and settlement procedures.

District-wise arrangements and detailed settlement guidelines have been made available at all TPCODL offices. Consumers may also contact their nearest Customer Care Centre or Fuse Call Centre (FCC) for assistance.

# TPCODL promotes solar energy adoption through PM Surya Ghar Yojana in Cuttack district

**PBD BUREAU**

BHUBANESWAR, MAY 14

PUBLIC awareness regarding solar energy adoption is steadily increasing across the Cuttack district under the PM Surya Ghar: Muft Bijli Yojana. TP Central Odisha Distribution Limited (TPCODL) is actively promoting the installation of rooftop solar systems under the scheme, making clean energy solutions easier, simpler, affordable and convenient for households.

As part of its outreach initiative, village-level awareness meetings are being organized across different parts of Cuttack district to educate consumers about the benefits of rooftop solar installations under the PM Surya Ghar: Muft Bijli Yojana.

An awareness meeting was recently conducted at Jagannathpur village under Nishchintakoili Fagol Gram Panchayat. During the meeting, residents were informed about the simple process of installing rooftop solar panels under the PM Surya Ghar scheme. Hundreds of villagers participated enthusiastically in the awareness programme and expressed keen interest in adopting solar energy solutions for their homes.

Speaking on the initiative, Arvind Singh CEO TPCODL said, "TPCODL is committed to supporting the Government of India's vision of promoting clean and sustainable energy solutions. Through continuous awareness programmes and consumer engagement, we are encouraging households to adopt rooftop solar systems under the PM Surya Ghar: Muft Bijli Yojana. This initiative will not only help consumers reduce their electricity expenses but also contribute towards a greener and more sustainable future."

TPCODL-Elec. Circle, Cuttack has witnessed significant growth in installations under the PM Surya Ghar initiative during 2025 and 2026. Starting with 46 installations in January 2025, the numbers showed a steady upward trend throughout the year, reaching 369 installations in December 2025.

The momentum further accelerated in 2026, with installations rising sharply to 455 in January and peaking at 1,384 installations in March 2026. A total of 6,364 installations have been achieved so far, reflecting the increasing consumer interest and adoption of rooftop solar systems in the Cuttack Electrical Circle area.

Under the PM Surya Ghar: Muft Bijli Yojana's ULA model, consumers can avail a 1 kW rooftop solar system by paying only Rs. 1,875.

## TPCODL conducts vendor meet to accelerate rooftop solar adoption in Odisha

PBD BUREAU

BHUBANESWAR, MAY 15

TPCODL organised a vendor meet under the PM Surya Ghar: Muft Bijli Yojana to strengthen coordination with empanelled vendors and accelerate rooftop solar adoption across its operational areas.

The programme was conducted in line with the Ministry of New and Renewable Energy (MNRE), Government of India's observance of May 2026 as the "Month of Solar", with a focus on expediting rooftop solar implementation and enhancing awareness regarding renewable energy adoption.

As part of the Month of Solar campaign, TPCODL is also undertaking various consumer awareness and outreach initiatives across its operational areas to promote adoption of rooftop solar systems and clean energy solutions.

The meeting brought together empanelled vendors from across the region to review implementation strategies, operational improvements and the ongoing progress under the PM Surya Ghar: Muft Bijli Yojana.

Around 250 vendors participated in the programme.

During the interactive session, vendors were encouraged to maintain high standards of service quality and ensure timely execution of installations to facilitate a seamless experience for consumers adopting rooftop solar solutions.

The vendors were also briefed on recent process modifications introduced by TPCODL to streamline implementation and improve operational efficiency under the scheme.

Under the PM Surya Ghar: Muft Bijli Yojana, more than 30,000 consumers across TPCODL operational areas have already availed benefits under the scheme. The initiative is enabling consumers to adopt clean and affordable energy solutions through Rooftop Solar (RTS) systems, helping households significantly reduce electricity expenses, with many consumers benefiting from substantially lower or near-zero electricity bills.

Speaking on the occasion, Arvind Singh CEO TPCODL said, "TPCODL is fully committed to supporting the Government's vision of expanding renewable energy adoption through the PM Surya Ghar: Muft Bijli Yojana. Our vendor partners play a critical role in ensuring timely and effective implementation of rooftop solar projects. We encourage all empanelled vendors to further enhance the pace of installations during the Month of Solar campaign and contribute towards building a sustainable energy future for consumers across Central Odisha. We also appeal to consumers to actively participate in this initiative and adopt rooftop solar systems to benefit from affordable, sustainable and environment-friendly energy solutions while significantly reducing their electricity expenses."

TPCODL continues to undertake focused initiatives for the promotion of renewable energy and remains committed to the effective implementation of the PM Surya Ghar: Muft Bijli Yojana across its operational areas.

# ओडिशा में रूफटॉप सोलर को बढ़ावा देने के लिए टीपीसी ओडीएल ने आयोजित किया वेंडर सम्मेलन

**नवभारत ब्यूरो। भुवनेश्वर।** टीपीसी ओडीएल ने ओडिशा में रूफटॉप सोलर ऊर्जा के उपयोग को तेजी से बढ़ावा देने और पीएम सूर्य घर: मुफ्त बिजली योजना के प्रभावी क्रियान्वयन के उद्देश्य से वेंडर सम्मेलन का आयोजन किया। कार्यक्रम में योजना के तहत सूचीबद्ध वेंडरों के साथ समन्वय मजबूत करने और सोलर परियोजनाओं की प्रगति की समीक्षा की गई। यह सम्मेलन भारत सरकार के नवीन एवं नवीकरणीय ऊर्जा मंत्रालय द्वारा मई 2026 को मंथ ऑफ सोलर के रूप में मनाए जाने के अवसर पर आयोजित किया गया। इसका मुख्य उद्देश्य रूफटॉप सोलर परियोजनाओं को समयबद्ध तरीके से पूरा करना और अक्षय ऊर्जा के प्रति जागरूकता बढ़ाना था।

कार्यक्रम में लगभग 250 वेंडरों ने भाग लिया। सम्मेलन के दौरान वेंडरों को उपभोक्ताओं को बेहतर सेवा देने, गुणवत्ता बनाए रखने और निर्धारित समय में सोलर सिस्टम इंस्टॉलेशन पूरा करने के लिए प्रोत्साहित किया गया। साथ ही योजना के तहत संचालन प्रक्रिया को सरल और अधिक प्रभावी बनाने के लिए किए गए नए बदलावों की जानकारी भी दी गई। टीपीसीओडीएल ने बताया कि उसके सेवा क्षेत्र में अब तक 30 हजार से अधिक उपभोक्ता पीएम सूर्य घर: मुफ्त बिजली योजना का लाभ उठा चुके हैं। रूफटॉप सोलर सिस्टम अपनाने से उपभोक्ताओं के बिजली खर्च में उल्लेखनीय कमी आई है और कई परिवारों को बेहद कम या शून्य बिजली बिल का लाभ मिल रहा है।

इस अवसर पर टीपीसी ओडीएल के सीईओ अरविंद सिंह ने कहा कि कंपनी अक्षय ऊर्जा के विस्तार को लेकर सरकार की सोच के प्रति पूरी तरह प्रतिबद्ध है। उन्होंने कहा कि वेंडर सहयोगी सोलर परियोजनाओं के समयबद्ध और प्रभावी क्रियान्वयन में महत्वपूर्ण भूमिका निभा रहे हैं। उन्होंने लोगों से भी रूफटॉप सोलर सिस्टम अपनाने की अपील करते हुए कहा कि इससे बिजली खर्च कम होने के साथ-साथ पर्यावरण अनुकूल और दीर्घकालिक ऊर्जा समाधान का लाभ मिलेगा। टीपीसीओडीएल लगातार अक्षय ऊर्जा को बढ़ावा देने के लिए विभिन्न जागरूकता और जनसंपर्क कार्यक्रम चला रहा है तथा पीएम सूर्य घर: मुफ्त बिजली योजना के सफल क्रियान्वयन के लिए सक्रिय रूप से कार्य कर रहा है।

# Odisha DISCOMs launch 'Mo Chhata, Mo Sanchaya' rooftop solar campaign

**PBD BUREAU**

BHUBANESWAR, MAY 18

IN a bid to promote rooftop solar adoption and create awareness about clean energy benefits, Odisha DISCOMs have launched a state-wide consumer outreach campaign 'Mo Chhata, Mo Sanchaya' under the PM Surya Ghar: Muft Bijli Yojana.

The campaign has been launched by Odisha DISCOMs, joint ventures between Tata Power and the Odisha government, as part of the Ministry of New and Renewable Energy's nation-wide "Month of Solar" initiative.

The initiative aims to encourage rooftop solar applications, expedite installations and increase consumer participation under the PM Surya Ghar scheme across urban and rural

areas of the state.

Under the scheme, eligible consumers can avail combined Central and state government subsidies of up to Rs 1.38 lakh for rooftop solar installations.

As part of the campaign, Surya Ghar Gram Sabhas are being organised at the Gram Panchayat level to spread awareness about rooftop solar adoption, subsidy benefits, installation procedures and long-term savings.

The DISCOMs are also engaging with sarpanches, block-level officials and local community representatives to facilitate consumer participation in the scheme.

The awareness drive is being carried out through newspaper advertisements, FM radio campaigns, social media outreach, community-level meetings and consumer engagement programmes across districts.

According to the PM Surya Ghar national portal, Odisha ranked first among Category-C states in rooftop solar installations during the Ministry of New and Renewable Energy's "Month of Solar" initiative between May 1 and 14.

The portal data showed that Odisha recorded 89,614 rooftop solar installations as of May 18, 2025, placing the state among the top 10 in the country.

# Odisha Hockey Star Olympian Amit Rohidas adopts solar energy under PM Surya Ghar: Muft Bijli Yojana

**PBD BUREAU**

BHUBANESWAR, MAY 20

INDIAN hockey Player, Olympian Amit Rohidas has embraced solar energy by installing a rooftop solar system at his residence under the PM Surya Ghar: Muft Bijli Yojana.

The initiative has significantly reduced the installation cost while ensuring long-term savings on electricity bills. His move reflects the growing confidence among consumers in adopting clean and sustainable energy solutions under the Government of India's flagship solar programme.

Sharing his experience, Amit Rohidas said: "When we play on the ground, every second is important to us. Similarly, every unit of electricity is very important for our home. Through PM Surya Ghar Muft Bijli Yojana, I have adopted solar energy and received a subsidy of ₹1,38,000. I thank the government immensely for such a scheme. I also thank TPCODL for assisting me in installing solar at my home. With solar, my electricity bill worries are gone—I don't have to pay bills anymore. Just as discipline is necessary for sports, solar is necessary for the future. This is a smart decision. You focus on your dreams... let the sun power your home."

Amit's move is expected to inspire thousands of households across Odisha to shift towards clean energy and avail the benefits of the PM Surya Ghar: Muft Bijli Yojana, which offers attractive subsidies for rooftop solar installation while contributing to environmental sustainability.

On this occasion, Amit Rohidas said that I have also installed solar panels on my roof, you can also do this and reduce your electricity bill.

Commenting on the initiative, Arvind Singh CEO TPCODL, said, "We are happy to see renowned sportspersons like Amit Rohidas adopting rooftop solar and promoting sustainable energy solutions. Such initiatives inspire communities to embrace greener choices for a better future. TPCODL remains committed to supporting consumers at every step under the PM Surya Ghar: Muft Bijli Yojana."

# Peak power demand up by over 300 MW than last year: Discoms

STATESMAN NEWS SERVICE
*Bhubaneswar, 23 May:*

In response to the unprecedented heat wave conditions across Odisha, with temperatures soaring up to 45°C in several parts of the state and peak power demand touching record highs this summer.

Drawing flak from several quarters and public unrest over undeclared power cuts , the discoms on Saturday came out with figures of the increased demand and measures adopted to tackle the situation .

The discoms are currently managing a peak demand of 6,739 MW across Odisha, nearly 300 MW higher than last year's peak demand of 6,447 MW. In Bhubaneswar alone, peak demand has risen by 17%, increasing from 641 MW last financial year to 750 MW this summer, reflecting the sharp rise in electricity consumption due to extreme temperatures.

More than 26,000 trained field staff, including maintenance teams, breakdown response teams, supervisors and safety officers, are engaged in continuous field operations to ensure quick restoration claimed the discoms. 67 power transformers, nearly 5,000 distribution transformers, more than 60,000 poles and around 9,000 kilometres of conductors and cables have been stocked.

A centralized Power Distribution Technology Centre (PDTC), supported by circle- and division-level control rooms, is continuously monitoring the power distribution network to enable swift response to outages,said the discoms on Saturday.

To strengthen consumer support during the peak summer season, the discoms have operationalized a 24×7 integrated customer care centre with 200 seats.

Due to the severe heat wave and prolonged outdoor exposure, many linemen and field personnel are also facing dehydration and heat stress while carrying out restoration and maintenance works.

The discoms said they have distributed ORS packets and implemented preventive measures against dehydration and sunstroke during field operations.

# TP Odisha Discoms activate emergency response system amid unprecedented heat wave, record power demand

PBD BUREAU
BHUBANESWAR, MAY 23

IN response to the unprecedented heat wave conditions across Odisha, with temperatures soaring up to 45°C in several parts of the state and peak power demand touching record highs this summer, Tata Power led Odisha discoms have activated a comprehensive emergency response system along with round-the-clock network monitoring and customer support mechanisms to ensure uninterrupted power supply and faster restoration services across urban and rural areas.

The discoms are currently managing a peak demand of 6,739 MW across Odisha, nearly 300 MW higher than last year's peak demand of 6,447 MW. In Bhubaneswar alone, peak demand has risen by 17pc, increasing from 641 MW last financial year to 750 MW this summer, reflecting the sharp rise in electricity consumption due to extreme temperatures.

More than 26,000 trained field staff, including maintenance teams, breakdown response teams, supervisors and safety officers, are engaged in continuous field operations to ensure quick restoration and reliable service delivery during the ongoing summer season.

To ensure rapid restoration during emergencies, the discoms have strategically positioned critical materials and restoration equipment across operational areas, including 67 power transformers, nearly 5,000 distribution transformers, more than 60,000 poles and around 9,000 kilometres of conductors and cables.

Emergency infrastructure such as tower wagons, man-lifters, hydraulic equipment, dewatering pumps, mobile distribution substations and tree-pruning machinery have also been kept on standby for immediate deployment.

A centralized Power Distribution Technology Centre (PDTC), supported by circle- and division-level control rooms, is continuously monitoring the power distribution network to enable swift response to outages and weather-related disruptions caused by Kalbaisakhi thunderstorms, lightning and strong winds.

To strengthen consumer support during the peak summer season, the discoms have operationalized a 24×7 integrated customer care centre with 200 seats. Consumers can register complaints through multiple channels including IVRS, mobile app, website, WhatsApp and missed-call facilities. Real-time outage updates and estimated restoration timelines are also being communicated through SMS, WhatsApp and social media platforms.

The discoms are working in close coordination with District Administrations, Fire Services, ODRAF and civic agencies to facilitate rapid clearance of fallen trees and other obstructions affecting power infrastructure during storms and extreme weather events.

The preparedness measures are backed by extensive preventive maintenance and network strengthening initiatives undertaken ahead of summer to enhance reliability and minimize supply disruptions.

Discom personnel are working round the clock to ensure uninterrupted power supply to more than 5 crore people across Odisha amid unprecedented heat wave conditions and rising power demand.

Operations and fault response teams remain on continuous field duty, braving extreme temperatures and challenging weather conditions to restore supply quickly and maintain network reliability at the ground level.

Due to the severe heat wave and prolonged outdoor exposure, many linemen and field personnel are also facing dehydration and heat stress while carrying out restoration and maintenance works.

To safeguard the health and well-being of frontline personnel, the discoms have distributed ORS packets and implemented preventive measures against dehydration and sunstroke during field operations.

The discoms also appeal to consumers to kindly cooperate and bear with the teams in managing critical situations arising out of extreme weather and unprecedented demand conditions.

Driven by the credo "For You, With You, Always," teams across the state continue to serve consumers with unwavering commitment and dedication during this challenging period.

## TPCODL Coverage Clips:

# Live Nerve Centre of Discoms: PDTC Leads 24×7 Operations & Monitoring Amid Record Summer Heat

Bhubaneswar, (Correspondent):: As Odisha continues to experience an intense heat wave with temperatures reaching up to 45°C across several districts, electricity demand has surged to an unprecedented 6,775 MW, the highest ever recorded in the state. To ensure uninterrupted supply during this critical period, Tata Power-led Odisha Discoms have activated a fully strengthened, round-the-clock emergency response system. At the centre of this entire system is the Power Distribution Technology Centre (PDTC), which functions as the primary command and control hub for TPCODL and also serves as the backup control centre for the other three Odisha Discoms: TPSODL, TPWODL, and TPNODL. In simple terms, PDTC operates as the "live nerve centre" of the power distribution system, continuously monitoring the health of the electricity network and ensuring that any disturbance is detected, analysed, and addressed in real time. The PDTC works 24×7 by receiving live information from across the network, enabled through a combination of SCADA systems (Supervisory Control and Data Acquisition) and integrated IT-OT systems. SCADA continuously captures real-time data from substations, feeders, transformers, and switching points and transmits it to PDTC. Operational Technology (OT) refers to the physical infrastructure in the field that carries electricity, while Information Technology (IT) refers to the digital systems that analyse, monitor, and support decision-making. PDTC sits at the critical intersection of IT and OT, ensuring complete real-time visibility of the physical network within the digital control environment. Whenever there is an abnormal condition such as a line fault, transformer overload, equipment failure, or weather-related damage, the SCADA system immediately triggers alarms at PDTC. These alarms act like instant alerts, helping operators quickly identify where the issue has occurred and what type of problem it is. This removes delays and allows immediate action. Once an alarm is received, PDTC coordinates in real time with field teams and local control centres to restore supply at the earliest. The system enables operators to isolate the affected section of the network, reroute power through alternative supply paths wherever available, and guide field crews directly to the fault location. This "detect, isolate, and restore" approach significantly reduces downtime and improves reliability, even during large-scale disruptions.
